

# Emergency Lighting

# SPOT Emergency Downlight

**Specification:** Stand-alone self-contained emergency LED downlight. Constant emergency light (1.5W/150lm & 3W/270lm) for 3 hours. Low stand-by power consumption (0.5W). Self-test versions and remote controls available. Lithium battery integrated. Non-maintained configuration. Ceiling recessed mounting. Suitable for open area and corridor indoor applications.

\* Self-test only available on AST and PST versions

## Key Features

- Non-maintained configuration
- High lumen output in emergency mod
- Fast battery re-charge (8 hrs)
- Low stand-by power consumption (0.5 W)
- Open area, corridor and spot lens option
- Remote control available

\* First battery charge takes up to 16 hours

## TESTING FACILITIES

MT (Manual Test)	This luminaire needs to be tested by a competent person according to BS EN 50172:2004. This luminaire can be used in conjunction with the Advanced Remote Control (ARC). ARC is an optional tool that adds new features to AST and MT emergency luminaires. If functional test or full duration test is initiated via ARC the MT luminaire will automatically switch to mains mode after the functional or full duration test is completed.
AST (Advanced Self-Test)	This is a self-test luminaire. Functional test is carried out automatically once a week and runs for 30 seconds. Full duration test is carried out automatically every 52 weeks. First full duration test is carried out automatically within the first 4 weeks after the luminaire being connected to mains voltage. This luminaire can be used in conjunction with the Advanced Remote Control (ARC). ARC is an optional tool that adds extra features to AST emergency luminaires. Please refer to the ARC's user guide.
PST (Programmable Self-Test)	This is a programmable self-test luminaire. It must be used in conjunction with a Programmable Remote Control (PRC). Please refer to PRC's user guide.
